UNITED STATES DISTRICT COURT  
WESTERN DISTRICT OF WASHINGTON  
AT TACOMA

RICHARD LEE RYNEARSON, III,  
Plaintiff,  
v.  
ROBERT FERGUSON, Attorney General  
of the State of Washington,  
and  
TINA R. ROBINSON, Prosecuting  
Attorney for Kitsap County,  
Defendants.

Case No. 3:17-cv-05531-RBL

**BRIEF OF *AMICI CURIAE* ELECTRONIC  
FRONTIER FOUNDATION AND  
AMERICAN CIVIL LIBERTIES UNION  
OF WASHINGTON IN SUPPORT OF  
PLAINTIFF'S MOTION FOR  
PRELIMINARY INJUNCTION**

Nancy L. Talner, WSBA #11196  
ACLU OF WASHINGTON FOUNDATION  
901 5<sup>th</sup> Avenue, Suite 630  
Seattle, WA 98164  
Tel: (206) 624-2184  
Email: talner@aclu-wa.org

*Attorney for Amici Curiae  
Electronic Frontier Foundation and American  
Civil Liberties Union of Washington*

**DISCLOSURE OF CORPORATE AFFILIATIONS AND OTHER ENTITIES WITH A  
DIRECT FINANCIAL INTEREST IN LITIGATION**

Pursuant to Rule 26.1 of the Federal Rules of Appellate Procedure, *amici curiae*  
American Civil Liberties Union of Washington and Electronic Frontier Foundation state that  
they do not have a parent corporation, and that no publicly held corporation owns 10% or more  
of the stock of *amici*.

DISCLOSURE OF CORPORATE AFFILIATIONS AND OTHER ENTITIES WITH A DIRECT FINANCIAL INTEREST IN LITIGATION..... ii

TABLE OF CONTENTS..... iii

TABLE OF AUTHORITIES ..... iv

I. INTEREST OF *AMICI* ..... 1

II. INTRODUCTION ..... 2

III. ARGUMENT ..... 2

    A. The statute’s restraint on Internet speech violates the First Amendment. .... 2

        1. The First Amendment protects “making an electronic communication.” ..... 3

        2. The First Amendment protects online expression with intent to “embarrass.” ..... 3

        3. The statute’s other prohibitions are overbroad, online and off. .... 5

        4. The statute criminalizes anonymous and repeated speech, which is protected by the First Amendment. .... 6

        5. The statute is overbroad because it lacks any requirement of harm. .... 8

    B. Portions of the statute also violate the due process clause because they are vague. .... 9

        1. The term “repeated” is vague. .... 10

        2. The phrase “harass, intimidate, torment, or embarrass” is vague. .... 10

    C. Conduct criminalized by phone harassment statutes is qualitatively different from Internet-related speech. .... 12

CONCLUSION..... 13

CERTIFICATE OF SERVICE ..... **Error! Bookmark not defined.**

## I. INTEREST OF *AMICI*<sup>1</sup>

1           The **Electronic Frontier Foundation** (“EFF”) is a San Francisco-based, non-profit,  
2 member-supported digital rights organization. Focusing on the intersection of civil liberties and  
3 technology, EFF actively encourages industry, government, and the courts to support free  
4 expression, privacy, and openness in the information society. Founded in 1990, EFF has over  
5 37,000 dues-paying members nationwide. EFF publishes a comprehensive archive of digital civil  
6 liberties information at [www.eff.org](http://www.eff.org). EFF serves as counsel or *amicus curiae* in many cases  
7 addressing free speech online. *See e.g., City of Vancouver v. Edwards*, No. 18998V (Wash. Dist. Ct.  
8 for Clark County 2012); *Backpage.com v. McKenna*, 2:12-cv-00954-RSM (W.D. Wa. 2012); *United*  
9 *States v. Cassidy*, 814 F. Supp. 2d 574, 585-86 (D. Md. 2011); *Savage v. Council of American-*  
10 *Islamic Relations, Inc.*, No. 07-cv-06076-SI (N.D. Cal. 2007).

11           **American Civil Liberties Union of Washington** (“ACLU-WA”) is a statewide,  
12 nonpartisan, nonprofit organization, with over 80,000 members and supporters, that is dedicated  
13 to the preservation of civil liberties including the right to free speech. The ACLU-WA strongly  
14 opposes laws and government action that infringe on the free exchange of ideas or that  
15 unconstitutionally restrict protected expression. It has advocated for free speech and the First  
16 Amendment directly, and as *amicus curiae*, at all levels of the state and federal court systems.  
17 *See, e.g., Berger v. City of Seattle*, 569 F.3d 1029, 1034 (9th Cir. 2009).

26 party, party’s counsel or other person contributed money to fund the preparation or submission  
27 of the brief.

## II. INTRODUCTION

1  
2 *Amici curiae* EFF and ACLU-WA support Plaintiff’s motion for a preliminary injunction  
3 to enjoin enforcement of RCW 9.61.260(1)(b) because the First Amendment clearly and fully  
4 applies to protect the Internet speech and other electronic communications impacted by this  
5 cyberstalking statute.

6 Plaintiff properly attacks subsection (1)(b) of RCW 9.61.260, as unconstitutionally vague  
7 and overbroad, lacking the precision the First Amendment requires when government regulates  
8 speech on the Internet. *Reno v. ACLU*, 521 U.S. 844, 874 (1997).

9  
10 RCW 9.61.260(1)(b) criminalizes everyday uses of electronic communications such as a  
11 parents’ posting of embarrassing photographs of their children on Facebook, or tweeted photos  
12 of ugly shirts and bad haircuts by a classmate before a 25-year re-union.

13 Plaintiff is correct. Subsection (1)(b) of the cyberstalking statute is unconstitutional.

## III. ARGUMENT

### A. The statute’s restraint on Internet speech violates the First Amendment.

14  
15  
16 Under the overbreadth doctrine, a statute violates the First Amendment on its face when  
17 “a substantial number of its applications are unconstitutional, judged in relation to the statute’s  
18 plainly legitimate sweep.” *United States v. Stevens*, 559 U.S. 460, 473 (2010). The First  
19 Amendment’s facial overbreadth doctrine applies fully to Internet speech and other electronic  
20 communications. *See, e.g., id.* (striking down a ban on creating and disseminating video  
21 depictions of animal cruelty); *Reno*, 521 U.S. 844 (striking down a ban on indecency on the  
22 Internet); *Doe v. Marion County*, 705 F.3d 694 (7th Cir. 2013) (striking down a ban on Internet  
23 social media use by registered sex offenders); *People v. Marquan M.*, 19 N.E.3d 480 (N.Y. 2014)  
24 (striking down a ban on harassment on the Internet).  
25  
26  
27

1 Here, a substantial amount of constitutionally protected speech is swept up in the statute's  
2 facially overbroad prohibitions.

3 **1. *The First Amendment protects “making an electronic  
4 communication.”***

5 The Washington cyberstalking statute is subject to First Amendment scrutiny because the  
6 core activity that it restrains is “mak[ing] an electronic communication” to a targeted person or  
7 any “third party.” RCW 9.61.260(1). “Electronic communication” is broadly defined to cover  
8 any digital transmission of information, including “internet-based communications.” RCW  
9 9.61.260(5). Thus, the statute applies to any conceivable form of modern electronic  
10 communications, including websites, blogs, social media, emails, instant messages, etc. Also, it  
11 applies both to one-on-one communications (such as email), communications to a closed list of  
12 people (such as Facebook), and communications available to everyone (such as a website).

13 It is well-settled that restraints on Internet speech may violate the First Amendment. *See,*  
14 *e.g., Ashcroft v. ACLU*, 542 U.S. 656 (2004) (preliminarily enjoining the Child Online Protection  
15 Act); *State v. Bishop*, 787 S.E.2d 814 (N.C. 2016) (striking down a North Carolina cyberbullying  
16 statute). *See also, e.g., Reno*, 521 U.S. 844; *Doe*, 705 F.3d 694; *Marquan M.*, 19 N.E.3d 480.

17 **2. *The First Amendment protects online expression with intent to  
18 “embarrass.”***

19 The core activity restrained by the Washington cyberstalking statute—making an  
20 electronic communication—enjoys the fullest First Amendment protection, even if such a  
21 communication is sent with “intent to . . . embarrass any other person.” RCW 9.61.260(1). A  
22 speaker’s intent to embarrass someone else does not diminish the First Amendment’s protection  
23 of electronic communication. Indeed, the First Amendment protects the right to express messages  
24 that are intended to cause embarrassment, insult, and outrage. *See, e.g., Boos v. Barry*, 485 U.S.  
25 312, 322 (1988) (“[I]n public debate our own citizens must tolerate insulting, and even  
26  
27

1 outrageous, speech in order to provide adequate breathing space to the freedoms protected by the  
2 First Amendment.”); *Hustler Magazine, Inc. v. Falwell*, 485 U.S. 46, 55 (1988) (emphasizing the  
3 Court’s “longstanding refusal to allow damages to be awarded because the speech in question  
4 may have an adverse emotional impact”); *NAACP v. Claiborne Hardware Co.*, 458 U.S. 886, 910  
5 (1982) (“Speech does not lose its protected character . . . simply because it may embarrass others  
6 or coerce them into action.”); *New York Times v. Sullivan*, 376 U.S. 254, 270 (1964) (“[D]ebate  
7 on public issues should be uninhibited, robust, and wide-open, and it may well include vehement,  
8 caustic, and sometimes unpleasantly sharp attacks on government and public officials”). The First  
9 Amendment “may indeed best serve its high purpose when it induces a condition of unrest,  
10 creates dissatisfaction with conditions as they are, or even stirs people to anger.” *Terminiello v.*  
11 *City of Chicago*, 337 U.S. 1, 4 (1949).

12  
13       Nothing in First Amendment case law distinguishes First Amendment protection on the  
14 basis of the mode of communication, i.e., online. Such protection exists to cover the nature of  
15 communication. Hence, the First Amendment should protect online speech intended to cause  
16 “embarrassment” to the same extent as embarrassing speech distributed via broadcast or the  
17 press, particularly because embarrassment caused by online speech has become quite common.  
18 Examples of online and electronic speech that the statute criminalizes blatantly illustrate why it  
19 violates the First Amendment because it is facially overbroad:

- 20  
21       • A newspaper website editorial argues that an elected public official should be removed  
22       from office because of drunken behavior at a Little League game.  
23  
24       • A government reform activist publishes on YouTube a video recording of a government  
25       employee stuffing her purse with office pens, and texts the message to her boss, to  
26       embarrass the wrongdoer and the boss, and thus encourage reform.

- 1 • A losing election challenger posts on his website a list of the incumbent’s past domestic  
2 violence arrests.
- 3 • A mother posts on Facebook embarrassing anecdotes and photos each year about her  
4 children, including stories the children might not want shared to commemorate the  
5 children’s birthdays.
- 6 • A college friend publishes embarrassing photos of his former classmates—the out-of-  
7 style hair and clothing!
- 8 • A fellow law partner embarrasses a colleague by posting an excessively laudatory  
9 message on the firm’s web-site about a big “win.”

10  
11 Clearly, the “embarrass” provision of the statute sweeps too broadly, encompassing protected  
12 speech within its net and this provision should be stricken. *Reno*, 521 U.S. 844

13 **3. The statute’s other prohibitions are overbroad, online and off.**

14 The statute also bans Internet communications sent with intent to “harass, intimidate, [or]  
15 torment” someone else. RCW 9.61.260(1). This speech restraint, also facially overbroad, violates  
16 the First Amendment.

17  
18 Courts have struck down online harassment statutes with similar words as facially  
19 unconstitutional. *Bishop*, 787 S.E.2d at 821 (striking down a ban on posting a minor’s private  
20 sexual information on the Internet with intent “to intimidate or torment”); *People v. Marquan M.*,  
21 19 N.E.3d 480 (N.Y. 2014) (striking down a ban on digital posts with “intent to harass, annoy,  
22 threaten, abuse, taunt, intimidate, torment, humiliate, or otherwise inflict significant emotional  
23 harm on another person”).

24  
25 Likewise, phone harassment statutes that contain similar words have been stricken as  
26 facially overbroad. *State v. Brobst*, 857 A.2d 1253 (N.H. 2004) (striking down a ban on phone

1 calls with intent to “annoy or alarm”). *See also United States v. Popa*, 187 F.3d 672, 678 (D.C.  
 2 Cir. 1999) (holding that a ban on anonymous phone calls with intent to “annoy, abuse, threaten,  
 3 or harass” was unconstitutional as applied to a person who repeatedly called a government  
 4 officer to complain about the government).

5 Speech bans containing language similar to that in RCW 9.61.260(1)(b) simply do not  
 6 pass constitutional muster in any circumstance. For instance, in *KKK v. City of Erie*, 99 F. Supp.  
 7 2d 583, 591-92 (W.D. Pa. 2000), the court struck down as facially overbroad a ban on wearing a  
 8 mask with intent “to intimidate, threaten, abuse or harass.” The court reasoned that there were  
 9 too many ways to apply this ban to constitutionally protected messages:  
 10

11 A statement, for example, that the white race is supreme and will rise again to  
 12 dominate all other races may seem intimidating, or even threatening, particularly  
 13 when advocated by a large group of demonstrators showing solidarity. Advocacy  
 14 for a return to segregation may likewise be intimidating, particularly if  
 15 accompanied by rough language. A diatribe against a local official who is an  
 16 ethnic minority, or a homosexual, may be considered “abuse.”

15 *Id.*

16 **4. *The statute criminalizes anonymous and repeated speech, which is***  
 17 ***protected by the First Amendment.***

18 The statute bans Internet communications, with the requisite state-of-mind, if they are  
 19 sent “anonymously or repeatedly.” RCW 9.61.260(1)(b). But the First Amendment protects  
 20 anonymous and repeated communications.<sup>2</sup>

---

21  
 22 <sup>2</sup> Plaintiff does not at this time challenge the statute’s ban on “lewd, lascivious, indecent, or  
 23 obscene” words or images. RCW 9.61.260(1)(a). However, *amici* note that the First Amendment  
 24 protects all but “obscene” communication. *Sable Commc’ns v. FCC*, 492 U.S. 115, 126 (1989).  
 25 Thus, the prohibition involving “lewd, lascivious, [or] indecent” communication in the statute  
 26 may also be constitutionally defective. The statute’s ban on threats, RCW 9.61.260(1)(c), would  
 27 violate the First Amendment as applied to speech that is not a “true threat.” At a minimum, the  
 speaker of an unprotected true threat must have a subjective intent “to communicate a serious  
 expression of an intent to commit an act of unlawful violence to a particular individual or group

1 Online communications protected by the First Amendment are no less protected when  
 2 posted anonymously. The statute makes it a crime to make a single electronic communication, if  
 3 one does so “anonymously,” and with intent to embarrass (or harass, intimidate, or torment)  
 4 another person. RCW 9.61.260(1)(b).

5 Anonymous speech<sup>3</sup> through electronic communications is common across the Internet  
 6 and it allows for valuable, protected discussions to occur. Internet anonymity is critical for  
 7 activists and other who could face harm and intimidation for publicly criticizing their powerful  
 8 opponents.  
 9

10 The First Amendment protects the right to communicate anonymously. *See, e.g., Buckley*  
 11 *v. American Constitutional Law Found., Inc.*, 525 U.S. 182 (1999) (striking down a ban on  
 12 anonymous solicitation of ballot access signatures); *McIntyre v. Ohio Elections Comm’n*, 514  
 13 U.S. 334 (1995) (striking down a ban on anonymous leafleting designed to influence voters in an  
 14 election); *Talley v. California*, 362 U.S. 60 (1960) (striking down a ban on any anonymous  
 15 leafleting). The Supreme Court has explained:  
 16

17 Under our Constitution, anonymous pamphleteering is not a pernicious,  
 18 fraudulent practice, but an honorable tradition of advocacy and of dissent.  
 19 Anonymity is a shield from the tyranny of the majority. . . . It thus exemplifies  
 20 the purpose behind the Bill of Rights, and of the First Amendment in particular:  
 to protect unpopular individuals from retaliation—and their ideas from  
 suppression—at the hand of an intolerant society.

21 of individuals.” *Virginia v. Black*, 538 U.S. 343, 359 (2003). *See also Elonis v. United States*,  
 22 135 S. Ct. 2001, 2012 (2015) (interpreting a federal threat statute to require a subjective “purpose  
 23 of issuing a threat” or “knowledge that the communication will be viewed as a threat”). *See, e.g.,*  
*Watts v. United States*, 394 U.S. 705 (1969) (protecting the statement, at a protest, that “if they  
 24 ever make me carry a rifle the first man I want to get in my sights is L.B.J.”).

25 <sup>3</sup> Anonymity can be created through use of pseudonyms. Myriad communication platforms,  
 26 like Twitter, Tumblr, and Reddit, invite speakers to use pseudonyms to participate in public  
 forums and private conversations. Email and messaging providers also typically allow speakers  
 to create accounts and send electronic communications using pseudonyms.

1 *McIntyre*, 514 U.S. at 357. *See also id.* at 341-42 (emphasizing the use of anonymous  
2 speech by the founders of the American republic).

3 The First Amendment protects the right to communicate anonymously extends to the  
4 Internet. *See, e.g., Doe v. 2TheMart.com Inc.*, 140 F. Supp. 2d 1088, 1092 (W.D. Wash. 2001);  
5 *Doe v. Cahill*, 884 A.2d 451, 456 (Del. 2005). “Internet anonymity facilitates the rich, diverse,  
6 and far ranging exchange of ideas. The ability to speak one’s mind on the Internet without the  
7 burden of the other party knowing all the facts about one’s identity can foster open  
8 communication and robust debate.” *2TheMart.com Inc.*, 140 F. Supp. 2d at 1092.

9 The statute also criminalizes electronic communication made “repeatedly” and with  
10 intent to embarrass (or harass, intimidate, or torment). RCW 9.61.260(1)(b). But speech does not  
11 lose its First Amendment protection, online or offline, merely because of its repetition. *See, e.g.,*  
12 *Survivors Network of Those Abused by Priests, Inc. v. Joyce*, 779 F.3d 785 (8th Cir. 2015) (in a  
13 case brought by a group that regularly protested outside of churches, striking down a ban on such  
14 protests).

15 There is no compelling state interest in banning repeated electronic communications,  
16 which are commonplace in an electronic environment, such as duplicate e-mail messages.  
17 Moreover, the recipients of unwanted messages typically have simple tools at their disposal to  
18 block, delete, or ignore repeated communications that are unwanted, without ever viewing the  
19 content of the communication itself.  
20

21  
22 **5. *The statute is overbroad because it lacks any requirement of harm.***

23 The statute’s facial overbreadth is aggravated by the absence of the element of harm to  
24 the subject of the speech or to anyone else.  
25  
26  
27

1 When a law burdens speech, government must “demonstrate that the recited harms are  
2 real, not merely conjectural, and that the regulation will in fact alleviate these harms in a direct  
3 and material way.” *Turner Broad. Sys., Inc. v. FCC*, 512 U.S. 622, 664 (1994) (plurality).  
4 Without a demonstration of harm, restraint on speech is not narrowly tailored. *See United States*  
5 *v. Alvarez*, 567 U.S. 709, 732-37 (2012) (Breyer, J., concurring in the judgment) (distinguishing  
6 the unconstitutional Stolen Valor Act, which did not require proof of actual or likely harm, from  
7 constitutional limits on false speech, which do).

8  
9 Here, the forbidden electronic communication need not cause any actual harm, or even be  
10 seen by the targeted person. Nor does the statute require any proof of any plausible possibility  
11 that the electronic communication might have caused harm to a reasonable person. Because there  
12 are myriad applications of the statute where “the recited harms” are not “real,” *Turner*, 512 U.S.  
13 at 664, the statute is facially overbroad.<sup>4</sup>

14 **B. Portions of the statute also violate the due process clause because they are**  
15 **vague.**

16 A criminal statute that is vague violates the Due Process Clause of the Fourteenth  
17 Amendment. The vagueness doctrine applies with “particular force” to laws that restrain speech.  
18 *Hynes v. Borough of Oradell*, 425 U.S. 610, 620 (1976). “[T]he void-for-vagueness doctrine  
19 requires that a penal statute define the criminal offense with sufficient definiteness that ordinary  
20 people can understand what conduct is prohibited and in a manner that does not encourage  
21 arbitrary and discriminatory enforcement.” *Kolender v. Lawson*, 461 U.S. 352, 357 (1983). *See*  
22

23  
24  
25 <sup>4</sup> A limiting construction cannot save the statute. At its core, the statute prohibits what the First  
26 Amendment protects: Internet communication that is intended to embarrass, if sent in a manner  
27 that is anonymous, repeated, or indecent. *See Reno*, 521 U.S. at 884 (limiting constructions are  
allowed only if the statute is “readily susceptible” to such construction, and courts cannot  
“rewrite” the statute).

1 also *City of Chicago v. Morales*, 527 U.S. 41, 60 (1999) (criminal statutes must “establish  
2 minimal guidelines to govern law enforcement”).

3 **1. *The term “repeated” is vague.***

4 The statutory term “repeated,” RCW 9.61.260(1)(b), is vague as applied to online  
5 communications.<sup>5</sup> Because online communications, such as messaging and social media  
6 interactions, tend to resemble real-time oral conversations rather than time-delayed written  
7 correspondence, it is unclear when an offending communication will be considered “repeated.”  
8 Consider three common online scenarios. First, some electronic communicators may send  
9 multiple short transmissions in quick succession (such as “hello” followed by “how are you”).  
10 Second, some electronic communicators correspond via multiple transmissions on both sides in  
11 quick succession (such as “hello”, “hello yourself”, “how are you”, and “ok”). Third, a sender  
12 might transmit a message to one person, and then quickly forward it to a second person. It is  
13 possible or any of the foregoing to be considered “repeated” communications due to the  
14 imprecision of the meaning “repeated,” making the communicators vulnerable to the prosecution  
15 under RCW 9.61.260(1)(b).  
16

17 **2. *The phrase “harass, intimidate, torment, or embarrass” is vague.***

18 The terms “harass, intimidate, torment, or embarrass,” RCW 9.61.260(1)(b), are also  
19 unconstitutionally vague, particularly in the context of Internet speech. A person who  
20 communicates on social media and other Internet channels often does not know who will receive  
21  
22  
23

---

24  
25 <sup>5</sup> The word “repeatedly” is also unconstitutionally vague in the context of offline harassment  
26 statutes. *Commonwealth v. Kwiatkowski*, 637 N.E.2d 854 (Mass. 1994).  
27

1 their messages, and whether the recipients are susceptible to embarrassment, intimidation,  
2 torment, or harassment.

3 For each of these statutory terms, the application of the statute will turn on the  
4 unpredictable effect of words on people with varying sensibilities. In *KKK*, the court on  
5 vagueness grounds struck down a ban on wearing a mask with intent to intimidate, threaten,  
6 abuse, or harass. The court explained: “To some extent, the speaker’s liability is potentially  
7 defined by the reaction or sensibilities of the listener,” and “what is ‘intimidating or threatening’  
8 to one person may not be to another.” 99 F. Supp. 2d at 592.

9 Likewise, in *State v. Bryan*, 910 P.2d 212 (Kan. 1996), the court struck down as  
10 unconstitutionally vague a statute against “following” where doing so “seriously alarms, annoys  
11 or harasses.” The court reasoned: “In the absence of an objective standard, the terms ‘annoys,’  
12 ‘alarms,’ and harasses’ subject the defendant to the particular sensibilities of the individual  
13 victim. Different persons have different sensibilities.” *Id.* at 220. *See also Coates v. City of*  
14 *Cincinnati*, 402 U.S. 611 (1971) (striking down a ban on “annoying” loitering); *City of Bellevue*  
15 *v. Lorang*, 140 Wn.2d 19, 992 P.2d 496 (2000) (striking down a ban on phone calls lacking a  
16 “legitimate” purpose).

17 The nature of the Internet, and social media postings in particular, exacerbate this  
18 forbidden unpredictability. In *KKK* and *Bryan*, the speakers could not predict the impact of their  
19 speech on the finite and knowable set of people that they physically encountered. On the  
20 Internet, it is many times harder for speakers to predict the impact of their speech on the infinite  
21 and unknowable set of people that might come across their speech in cyberspace.  
22  
23  
24  
25  
26  
27

1 **C. Conduct criminalized by phone harassment statutes is qualitatively different**  
2 **from Internet-related speech.**

3 Internet communications are materially different than phone communications. Thus,  
4 while Washington courts have upheld telephone harassment and threat statutes against  
5 overbreadth and vagueness challenges, the Washington cyberstalking statute addresses  
6 fundamentally different conduct. *See State v. Alphonse*, 147 Wn. App. 891, 197 P.3d 1211  
7 (2008); *State v. Alexander*, 888 P.2d 175 (1995); *State v. Dyson*, 74 Wn.App. 237, 872 P.2d 1115  
8 (Ct. App. 1994); *City of Seattle v. Huff*, 111 Wn.2d 923, 767 P.2d 572 (1989). These courts  
9 relied on distinctively invasive features of phone calls that are not shared by Internet  
10 communications. *See Alexander*, 888 P.2d at 180 (“The gravamen of the offense [of telephone  
11 harassment] is the thrusting of an offensive and unwanted communication upon one who is  
12 unable to ignore it.”); *id.* at 179 (“[A] ringing telephone is an imperative which must be obeyed  
13 with a prompt answer.”); *Dyson*, 872 P.2d at 1120 (“[T]he telephone . . . presents to some people  
14 a unique instrument through which to harass and abuse others.”). Moreover, “the recipient of a  
15 telephone call does not know who is calling, and once the telephone has been answered, the  
16 victim is at the mercy of the caller until the call can be terminated by hanging up.” *Alexander*,  
17 888 P.2 at 179. Finally, “telephone communication occurs in a nonpublic forum.” *Id. Accord*  
18 *Huff*, 767 P.2d 574.  
19

20 Unlike a phone call that is directed to one person, a Facebook update, a Tweet, and a blog  
21 post are directed to many people. Where a phone call “occurs in a nonpublic forum,” *Alexander*,  
22 888 P.2 at 179, the “vast democratic forums of the Internet” are today “the most important places  
23 (in a spatial sense) for the exchange of views.” *Packingham v. North Carolina*, 137 S. Ct. 1730,  
24 1735 (2017). *Cf. Frisby v. Schultz*, 487 U.S. 474, 486 (1988) (distinguishing a protest directed at  
25 a specific person’s home, which is not protected, from a protest directed at all of the homes in a  
26  
27

neighborhood, which is protected). Moreover, while a phone call can “thrust[] an offensive and unwanted communication upon one who is unable to ignore it,” *Alexander*, 888 P.2 at 180, people have tools of choice to avoid unwanted electronic communications.

Even one-to-one digital communications, like many emails and text messages, lack key features that save the telephone harassment statutes. Recipients of electronic communications, unlike recipients of phone calls, can more easily avoid unwanted messages. No ring requires an immediate response; email recipients can delay review at their discretion. There is no risk that a recipient will accidentally speak to a person they are avoiding; email recipients can decide which messages to delete without reading their contents. *Cf. Reno*, 521 U.S. at 869 (“the Internet is not as ‘invasive’ as radio or television,” because it does not “‘invade’ an individual’s home or appear on one’s computer screen unbidden”).

**CONCLUSION**

For the reasons above, *amici* Electronic Frontier Foundation and American Civil Liberties Foundation of Washington respectfully request that this Court grant Plaintiff’s motion for preliminary injunction, and strike down RCW 9.61.260(1)(b) in Washington cyberstalking statute as facially overbroad in violation of the First Amendment and vague in violation of the Fourteenth Amendment.

Dated this 12<sup>th</sup> day of October, 2018.

Respectfully Submitted,

By: s/Nancy L. Talner
